3 Tips to Stop Spewing Chips with Pocket Jacks

FOR A LOT OF PLAYERS POCKET JACKS WILL OFTEN TIMES EITHER WIN A SMALL POT OR LOSE A BIG POT.

There are two common ways players misplay Jacks

- Playing overly aggressive forcing only better hands to continue
- Playing too passively and missing value from worse hands

Tip 1 Pay Attention to Stack Depth

Stack depth is crucial when playing Pocket Jacks.

When in the 30 to 40 big blind range you're almost always going to want to get it all-in with Jacks.

There are only a few hands that beat you pre-flop and most players will cram it in at this stack depth with a relatively wide range.

Tip 2 Don't Get Married to the Hand

This tip applies for any big hand, but it's particularly helpful for pocket Jacks.

It may seem obvious to some, but being able to get away from your Jacks post flop on dice boards is incredibly important.

This doesn't mean you should be scared of being beat. Just check and analyze the hand as it progresses.

Tip 3 Don't Let Jacks Tilt You

Folding or losing with Jacks can be very tilting, especially if you aren't sure you made the right decision.

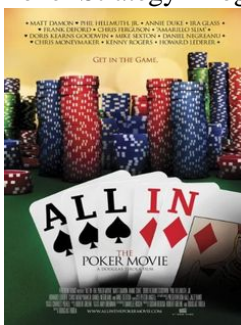

A lot of inexperienced players will think "Wow if I can't win with (JJ) what can I win with?" and proceed to tilt off the rest of their chips making horrible decisions.

But losing with big hands is a part of poker. Your opponent's will go through it too. What matters most is which player will handle that adversity better.

TIPS TO PLAY SOFT HANDS AND HARD HANDS - ONLINE BLACKJACK

Blackjack is one of the most popular games at the online casinos. The blackjack game is also called as the game of twenty players. If you're new to blackjack, you should start by learning the basic rules. If you already understand how the game is played, then explore our top soft and blackjack strategies below to get the information you want.

Tips & Strategies for playing soft hands

1. Develop your skill of tracking the cards the Dealer is holding. In case you hold a combination of 17 or 18 and the Dealer has 10 or 11, you should stand.
2. 17 will be the right choice if you hold a combination of an Ace + 4 or an Ace + 5. If the Dealer holds anything between 4 and 6, you should consider Double Down.
3. There is this common mistake when people prefer to stick when they get on 17 or 18. They should not do that because unless you can't 4, 5 and 6 in the Dealer's hand, it is not a good idea.
4. A moment of confusion when you have an Ace + 2. If the Dealer has 2, 7 and 8, you should stand. If the Dealer has anything between 3 and 6, press Double. For any other possibilities, press Hit.
5. Use the word 'stand' with the confusing, scoring and branding strategies. That will be the right choice unless you can't 4, 5 and 6 in the Dealer's hand. If the Dealer has anything between 3 and 6, press Double. For any other possibilities, press Hit.
6. Try to play the soft hands until they convert into hard hands.

Tips & Strategies for playing hard hands

1. If you get on 8 or cards with lower values, press the Hit button.
2. If you make a 9 and the Dealer is showing anything between 2 and 6, press Double Down. If the Dealer is showing anything between 7 and 10, press Hit.
3. If you make a 10 and the Dealer is showing anything between 2 and 10, then press Double Down. For any other cards in the Dealer's hand, press Hit.
4. If you get on 11 and the Dealer is holding anything between 2 and 10, then press Double Down. If the Dealer has an Ace, then Hit should be your choice.
5. If you have a 12 and the Dealer has either a 2 or 3, then simply press the Hit button. If the Dealer's hand is 4, 5, 6, 7, 8, 9, 10, then press Hit. For any other possibilities, Double Down.
6. If you make anything between 13 and 16 and the Dealer has anything between 2 and 6, then do not touch anything else than Stand. If the Dealer shows anything else, then press Hit.
7. If you get anything between 17 and 21, and the Dealer shows anything between 2 and 6, then your choice should be Stand.

If you are a beginner in Blackjack, then practice these steps by playing free online Blackjack games for a number of times. When you gain confidence, shift to become a serious player and play for money.
